Patient Information

State and federal regulatory agencies

Sunray Drugs Specialty will contact you and your prescriber in the event of an FDA Class I recall. Sunray Drugs Specialty will contact your prescriber or your health plan for lesser recalls

Payment Policy

Insurance Navigation

Our team will contact your insurance company to request coverage of the medication. This process is often called a “prior authorization.”

Financial Assistance

The co-pay, deductible, and co-insurance amount for a specialty pharmacy medication may still be high even if your insurance company pays for most of the cost. We will look for financial help programs available to possibly lower your cost of medication. If Sunray Drugs Specialty is a pharmacy out of your insurance network, the cost charged by Sunray Drugs Specialty for the medication will be provided to you in writing. Additionally, the cash price of a medication will be provided to you upon request.

Outstanding Balances

If for any reason you owe a balance, the balance will need to be paid prior to your next refill. We accept Visa, MasterCard, American Express, and Discover credit cards.

Payment Plan

If you need help in arranging a payment plan for the money you owe, please call us at 1-888-260-9555.

If you get a check from the insurance company, you should send it to Sunray Drugs Specialty with a copy of the Explanation of Benefits (also known as the EOB) statement you received.

Patient Safety

Adverse Drug Reactions

Patients experiencing adverse drug reactions, acute medical symptoms, or other problems should contact Sunray Drugs Specialty or their prescriber. You should call 911 or have someone drive you to the local emergency room if the reaction appears life threatening.

Disposal of Home-Generated Biomedical Waste and Medications

Home-generated biomedical waste is any type of syringe, lancet, or needle (“sharps”) used in the home to either inject medication or draw blood. Special care must be used with the disposal of these items to protect you and others from injury, and to keep the environment clean and safe.

If your therapy involves the use of needles, a sharps container will be provided. Please follow these simple rules to ensure your safety during your therapy:

Sharps

Place all used needles, syringes, lancets, and other sharp objects into a sharps container.

If a sharps container is not available, a hard plastic or metal container with a screw-on top or other tightly securable lid (for example, an empty hard can or liquid detergent container) could be used. Reinforce the top with heavy-duty tape before throwing away. Do not use clear plastic or glass containers. Containers should be no more than 3/4 full.

Disposal

Check with your local waste collection service to verify the disposal procedures for sharps containers in your area. You can ask your prescriber’s office about the possibility of disposing of items in the prescriber’s office during your next office visit. You can also visit the Centers for Disease Control and Prevention (CDC) Safe Community Needle Disposal website at <http://www.cdc.gov/needledisposal/> for more information.

For instructions on how to properly dispose of unused medications, please contact the pharmacy or go to the below FDA websites for information and instructions:

Patient Safety

- ▶ www.fda.gov/forconsumers/consumerupdates/ucm101653.htm
- ▶ www.fda.gov/drugs/resourcesforyou/consumers/buyingusingmedicinesafely/ensuring-safe-use-of-medicine/safe-disposal-of-medicines/ucm186187.htm

Needle-Stick Safety

- ▶ Never replace the cap on needles.
- ▶ Throw away used needles immediately after use in a sharps disposal container.
- ▶ Plan for the safe handling and disposal of needles before using them.
- ▶ Report all needle stick or sharps-related injuries promptly to your prescriber.

If your therapy does not involve the use of needles or sharp items, you do not need a sharps container. You should place all used supplies (e.g., syringes or tubing) in a bag you can't see through. Put this bag inside a second bag, and put this in your garbage with your other trash.

Hand-Washing Instructions

Infections are serious issues. The best way to make sure you do not get an infection is to wash your hands often. Remember to always wash your hands before and after you prepare or handle any medication.

1. Collect the supplies:
 - ▶ Soap
 - ▶ Paper towels or a clean cloth towel
2. Wet your hands with warm water.

Emergency Preparedness

General Home Safety

Each year nearly 21 million family members suffer injuries in the home. We want you and your family to live in a safe environment. We have provided some suggestions that could help you prevent an injury within your home. Check every room in your house and make your home safer.

Falling *This is the way that people are most often injured in their homes!*

- ▶ Keep the floor clean. Promptly clean up spills.
- ▶ If you use throw rugs, place them over a rug liner or choose rugs with non-skid backs to reduce your chance of falling.
- ▶ Use a non-slip mat or install adhesive strips in your tub or shower.
- ▶ Tuck away telephone, computer, and electrical cords out of walkways.
- ▶ All stairs and steps need handrails. If you have stairs in your home and have children, use baby gates at the top and bottom of the stairs.
- ▶ Have all walkways well lit and use night lights as needed.
- ▶ Have a flashlight that works.

Poisoning

- ▶ Keep all hazardous materials and liquids out of the reach of children.
- ▶ Keep medications out of the reach of children.
- ▶ Know your local poison control number or dial (800) 222-1222.

Fire and Burn Prevention

- ▶ Have smoke detectors in the home, and replace batteries at least once per year.
- ▶ Test each smoke detector once a month.
- ▶ Have a fire plan and be sure all family members know what to do if there's a fire.
- ▶ Place covers over electrical outlets.
- ▶ Check to make sure your water heater is set no higher than 120° F.
- ▶ Keep children away from the stove and never leave the stove unattended while cooking.
- ▶ Keep matches and lighters out of the reach of children.

Power Outage

- ▶ Notify your gas and electric companies if there is a loss of power. Report any special needs for a backup generator to the electric and gas companies.
- ▶ Have a transistor radio, flashlights, batteries, and/or candles available. (If on oxygen, turn it off before lighting candles.)

Emergency Preparedness

Fire

- ▶ Rescue anyone from immediate danger:
 - ▶ If bedridden, tie a knot in the head and foot of the sheet.
 - ▶ Using the sheet, pull the person to safety. If two people are available, make a chair from the rescuers' arms and carry the patient to safety.
- ▶ If safe, alert the fire department. Otherwise, evacuate the area.
- ▶ Turn off oxygen (if applicable), and try to contain the fire by closing off any access, such as doors.
- ▶ Attempt to extinguish the fire only if it is in a small localized area. Otherwise, evacuate the building and notify the fire department when you are safe.

Natural Disasters (Earthquake, Hurricane and Tornado)

- ▶ In disaster-prone areas, store food and extra bottled water. Have a transistor radio, flashlights, and extra batteries. Report any special needs for a backup generator to electric and gas companies.

- ▶ Check your home for any gas or water leaks and turn off appropriate valves.
- ▶ Stay away from windows or broken glass. Wear shoes at all times.
- ▶ Evacuate area if necessary.
- ▶ If evacuation is necessary, go to the nearest shelter and notify the organizers of any special needs you have.

Flood

- ▶ Evacuate the area.
- ▶ Contact the local law enforcement, civil defense, and/or emergency preparedness.

Frequently Asked Questions

How much will my medications cost?

Your co-pay amount will vary based on your insurance plan. We will tell you this amount after we have processed your prescription.

What if I can't afford my medication?

Some patients are eligible for financial assistance through drug companies or charities. We will perform a full review of options available, tell you about available options, and enroll you in the program if you meet eligibility requirements.

What if my insurance company doesn't cover my medication?

Our staff works directly with your prescriber and insurance company to obtain coverage for your therapy. If it is denied, your prescriber will discuss other options with you.

Can I still get access to my specialty medication if I lack prescription coverage?

Some drug companies offer a Free Drug Program. If that's available, we will help you enroll in the program.

Will you ever change my medication to another medication?

From time to time, it is necessary to change generic drugs for brand-name drugs. This could happen due to your insurance company preferring the generic be dispensed or to reduce your co-pay. If a change needs to be made, a member of the specialty pharmacy staff will contact you prior to shipping the medication to inform you of the change.
